

COLLEGE

SIMPLICITY AND FUNCTIONALITY

The easiest solutions are very often the best solutions. The College line's universal design is perfect both for auditoriums and lecture halls. The biggest advantages of the armchairs are durability and the possibility of arranging them flexibly. The wide range of finishes allows for choosing upholstery that matches the character of every hall. The materials used in the armchair are high quality and durable, yet affordable.

The supportive structure of the armchair is a frame made of powder-coated steel. The seat has been ergonomically contoured with rounded edges, which increases the user's comfort. The backrest ensures the right spine support. Both the seat and the backrest are made of multilayer beech plywood. They are also available with upholstered pads.

The functionality of the College armchairs is increased by additional equipment elements, which help users organise themselves. The foldable desktop made of beech plywood with horizontal adjustment facilitates notes taking. An alternative to this option is a shelf made of melamine board, which is fixed permanently to the armchair. The steel, chromium-plated basket made of durable and flexible materials helps users keep the hall neat and tidy – it is the ideal place for a folder, laptop or other small personal items.

Thanks to the use of a special flexible solution for combining chairs in rows, the width between neighbouring seats can be adjusted smoothly. Another good solution is the automatically foldable seat, which makes it easier for users to move between rows.

Taking care of the space aesthetics, it is possible to equip the first row with a special front-covering panel made of beech plywood.

* Particular dimensions can be individually adjusted to a given project.
All dimensions are in centimetres.

CHARACTERISTIC FEATURES AND AVAILABLE OPTIONS:

- The ergonomically contoured seat ensures great comfort.
- Additional upholstered pads increase the user's comfort.
- A fixed shelf or foldable desktop facilitates notes taking.
- A basket enables users to keep the hall neat and tidy.
- The possibility of adjusting armchair dimensions means more flexible space arrangement.

CERTIFIED PRODUCTION:

We manufacture products at a global level. Our chairs are characterised by top quality and the highest durability. In all of our production plants we have implemented the best quality management system: **ISO 9001:2000**. At the same time, we take care of the natural environment. We use the environmental management systems created according to the **ISO 14001** standard in the majority of our factories. This enables us to minimise our impact on the natural environment and confirms that our products contain no heavy metals.
